

# What is your main expectation for this regional activity?

16 Answers

Mentimeter

I believe that such activities will help us to connect with each other and share experiences and innovation to increase the green social impact and implement the circular economy in our business

Renforcer les capacités des concepts de l'économie circulaire en Méditerranée

Exchanging experiences with other partners from the Mediterranean area in order to facilitate prospective collaboration and knowledge exchange for this project and future ones.

I expect this activity to increase my knowledge and benefit from the experiences of the participants in the field of waste management

Building deeper relationships with local government through their representatives participating in the program, which will allow us to move more quickly toward sustainable industries.

Hearing more success stories in which how policy makers could be approached.

to gain a deeper understanding of circular economy principles, and get insights on the know how and best practices adopted by other peers and study the implications on my country and how to adapt

Comprendre les principes de l'économie circulaire. Acquérir des connaissances et des compétences pratiques. Étudier des cas et des exemples. Avoir des opportunités de réseautage. Accéder à des experts

assimiler le concept de l'économie circulaire et son rôle dans le développement durable. Prendre connaissance et m'enrichir des différentes expériences Renforcer la coopération Sud-Sud
